  - **IBID**

# What is JCCC

- Customized private portal for accessing the Journals “subscribed” by the Consortia
- Intranet solution for seamless access to subscribed e-Journals
  - Supports Automatic Password Authentication
  - Links are visible only for journals to which online access rights are secured by the accessing Library.
- A virtual library model for accessing and sharing available print journal resources.

# Benefits of JCCC

- Convenience of resource sharing – Online or Print
- Common database and index to the contents of all Journals subscribed by different category of members
- Consortia user can instantly search and find which article is available in which journal and which library
- Helps in reduction of expensive and non-essential duplication
- Additionally, offers FREE full-text online access to the articles published in 6000+ journals.
- JCCC acts as Publisher Independent Gateway for the Consortium for
  - e-Journal Access and Management and
  - facilitates Document Delivery .

# JCCC

- J-Gate Custom Content for Consortia helps in:
  - Inter-Library Loan
  - Linking to Open-Access Journals
  - Single-Point Authentication
  - Creation of Union Catalogue
  - Personalized TOC Alerts to Users
  - Subject Specific Search

# JCCC@INDEST

- Access to more than 6000 journals from 1000+ Publishers
- Resources Covered
  - Online Journals
  - Print Journals
    - Library holdings of IIT's, IIM's and IISc, etc. for Document Delivery
    - Library Holdings of NIT's to enable users to locate a nearby library
  - Full-Text Databases

# Key Features

- All members, irrespective of their category have full-facility access (Gateway Access) except for document delivery privileges which are governed by the rules set by INDEST. The full-facility access includes:
  - Single point searching and browsing for all the subscribed content (Abstract Level) of Level 1
  - Gateway access (Full-Text Level)
  - Resource Sharing (Document Delivery Level)
  - Counter-2 Compliant Usage report, accessible online by member library.
- Link resolver integration for all members with one instance.
- Access to aggregator's content for all members depending on what they subscribe.
- Referral model for document delivery for the journals subscribed by non-IIT/IIM group.

# Questions

**THANK YOU**
